

## True Science in the Holy Bible

God's warning -

**1 Timothy 6:20** ... *oppositions of science falsely so called*

When the Holy Bible is touches on scientific matters it is completely accurate and remarkably prophetic. It mentions scientific facts that were neither known nor understood by man until centuries after the Bible was written. Job, the first book of the Bible, has many scientific references.

**38:16** *springs of the sea*

Until 20th century, science taught that the oceans were 'fed' only by rivers and rain.

The ocean is very deep (average depth = 12,100 feet ~ 2.3 miles)

Almost all of it's floor is in total darkness.

The pressure is enormous (average = 6,000 pounds per square inch).

No one had explored any of the ocean's floors - it was impossible.

In the 1970's, equipment was developed that was able to reach the shallowest ocean floors (nb- deepest part in W. Pacific = 36,200 feet / pressure > 9,000 psi).

Oceanographers **discovered** *springs* on the ocean floors !

Job wrote of this scientific fact 4,020 years ahead of the scientists.

**38:19** *the way where light dwelleth*

Aristotle proposed in his work *Physics* that light was transmitted instantly.

This view was considered hard science until Galileo proposed an experiment that was conducted by Ole Romer in 1676. Romer demonstrated that light travels along a path (or way) at a finite speed (as ,opposed to instantaneously).

The Bible was 37 plus centuries ahead of the 'experts'.

**38:24** *what way is the light parted*

Until the 17th century scientists also thought that light was only 'white'.

Then Isaac Newton discovered that light *parts* through a prism into 7 primary components (red, orange, yellow, green, blue, indigo, violet).

Newton presented his full set of experiments in a book called *Optics* to the Royal Society of London in 1676 .

Job declared this scientific fact over 37 centuries earlier.

**38:22** *treasures of ... snow or hail* [only time either phrase occurs is here]  
*snow* - (24x in 11 OT & 3 NT) doct: Rev 1:18 Mk 9:3 Isa 1:18

As snowflakes fall they absorb nitrates from the atmosphere and the release these nutrients into the soil in the spring. Snow is called 'poor man's fertilizer'

Also Psalm 147:16 says: *He giveth snow like wool* . e.g. an igloo,

An igloo can keep one warm in extreme cold. One of the *treasures* of an igloo is that it makes *snow like wool*. Solid ice is a poor insulator, but snow has many air pockets per cubic foot. The bottom level of an igloo acts as a 'cold sump'. All the cold air runs down into the sump leaving upper portions warmer. Even with outside temperatures of 50 below (Fahrenheit) the inside can be 20 degrees. Furthermore a fire can be lit in the center of an igloo and the igloo will not melt because the igloo snow will conduct the heat through to the outside as fast as the fire delivers the heat.

God provided the *treasures of the snow* for his people during the ice-age.  
 {for further study, see reference #4}

**38:29-30** *the ice...hoary frost...frozen*

Today the earth is divided into three temperature zones (tropical, temperate and polar). This was not the case from the Garden of Eden to the great Flood. The entire planet was temperate (or moderate) with no harsh weather patterns.

'The characteristics of sedimentary rocks and their contained fossils suggest a worldwide subtropical "greenhouse effect" ' (p 308, *Morris*).

Job and his friends are living within a few centuries after Noah's flood.

They are experiencing and commenting on the glacial period (or 'ice-age') which was caused by the catastrophic deluge which drastically altered the earth's geography, topography and climate.

**38:31** *bind Pleiades ... loose Orion*

Pleiades - a seven star cluster in the constellation Taurus is among the nearest star clusters to the Earth. It is the only cluster where the stars are close enough to one another to be gravitationally bound.

Orion is the primary decan of Taurus (each of the 12 zodiac constellations has three minor constellations called *decans*. e.g. the big dipper and little dipper are the first two decans of *Cancer*). Orion is large and bright and has 80 stars, but astronomers have found that the star cluster is *loose* and disintegrating.

Only recently have we learned that Pleiades is bound by gravity and Orion's stars are drifting apart.

God's word is light years ahead of today's 'scholars'. **1 Cor 1:19-20**

**38:35** *Canst thou send lightnings, that they may go, and say...*

In the 19th century researchers William Herschel and James Clerk Maxwell discovered the electromagnetic spectrum with its various EM waves (radio waves, microwaves, infrared, light waves, UV-waves, X-rays, and gamma rays).

We now know that radio and light waves are two forms of the same thing - electromagnetic waves. Therefore, radio waves are a form of light. Today we use radio transmitters to send *lightnings* which speak (*say*) when they arrive.
