## The Supreme Premise

---

### *Genesis 1:1-2*

#### **Review:**

A proper understanding of the beginning of the Bible is necessary to understand the rest of the Bible. Given the prominence of evolutionary thinking, the Biblical account of creation is constantly under attack in our society. If man can do away with a creator, then he isn't accountable to him. This series of messages will be critical to our understanding as we seek to live in the world, but not of the world.

#### **Outline Review:**

- I. The origin of the universe is a person: God.
- II. God acts in history.

#### **Application:**

1. Genesis tells us about the beginning of many things. What are some of them? (earth, work, sin, marriage, worship, gospel, etc.)
2. How do these verses contradict atheism (no god), pantheism (everything is god), materialism (only matter exists), humanism (man is god), and evolution?
3. Why would man want to deny the truth that God made everything? What are ways that you practically deny God's existence in your life?
4. Why is it significant that God created with His Word? How has His Word affected your life? How do you keep his Word in you?
